External SATA Flash Drive

eSATA / USB External Flash Drive

The External SATA (eSATA) Flash drive is the new standard in mobile storage. It supports read speeds up to 90MB/sec, about three times faster than the fastest USB drives. Write speeds are a sprightly 30MB/sec, so you waste less time copying data and more time carrying data.

With speed like this, the eSATA drive is ideal for carrying video clips and feature length videos as well as all your favorite MP3s, photos and presentations. The eSATA drive is offered in 8GB, 16GB and 32GB capacities.
